Mississauga Secondary Academy

1. Mississauga Secondary Academy's Goals and Philosophy

As a co-educational private day school, Mississauga Secondary Academy (hereafter referred to as MSA) offers university and college preparatory programs. With a strong belief that every student is unique and every student is capable of success, MSA is committed to providing an encouraging, safe and academic environment to ensure every student has a positive learning experience and is successful in achieving his or her goals.

Understanding the importance of a secondary education for the development of student knowledge and skills, which is crucial to a healthy active life and career, MSA strives not only to meet the requirements of the Ministry, but also to make every effort to go above and beyond to enrich their learning experience.

Every student of MSA will get adequate attention and care so that his or her unique needs and strengths can be uncovered through small classes and proactive communication among student, parents and the school. In turn, a proper learning strategy aimed to fully develop a student's potential will be created and executed with the efforts from the student, parents, teachers, supporting school staff and the communities in a safe, healthy and positive learning environment.

1.1 Our Objectives

As an important educator, our objectives are to:

- Help students develop knowledge and skills under the provincial fundamental principles of Respect, Civility, and Responsible Citizenship;
- Provide our students with a safe, clean, healthy, caring and positive learning environment;
- Make every effort to meet every student's needs and learning styles and to help everyone succeed.
- Establish management systems to ensure the school is safe, inclusive and accepting so that all students and the broader community can benefit.

1.2 Our Commitment

Realizing the challenge of meeting the unique learning needs of each student while maintaining a high academic standard, Mississauga Secondary Academy is dedicated to build a platform and an environment to engage every group - students, parents, teachers, school staff and the communities, in this important learning journey.

Mississauga Secondary Academy

We will:

- Follow all procedures, guidelines and rules from the Ministry;
- Meet and exceed the Ontario Curriculum expectations;
- Treat each student with respect and dignity;
- Communicate with each student and parents on a regular basis (minimum on a quarterly basis) to ensure student progress is monitored, reported, concerns addressed and resolved, and an improvement strategy is implemented.

1.3 School Schedule

Organized as a year-round private high school, Mississauga Secondary Academy operates from 9:00am to 9:00pm, Monday to Sunday in four regular semesters and two summer terms. The first school day in 2016-2017 is September 6 of 2016 and the total number of school days is 229. Please see attached school calendar for details.

The report cards will be issued to students and parents four times during the school year with the first one to be issued in November.

2. The Requirements for Diploma and Certificate

2.1 The Requirements for OSSD

In order for a student to receive an Ontario Secondary School Diploma (OSSD), he or she **MUST:**

- **Earn a minimum of 30 credits including 18 compulsory credits and 12 optional credits;**
- **Meet the provincial secondary school literacy requirement; and**
- **Complete 40 hours of community involvement activities.**

2.1.1 *18 Compulsory Credits*

The 18 compulsory credits must be distributed as the following based on the requirements of the Ministry of Education (*Ontario Schools, Kindergarten to Grade 12, Policy and Program Requirements, 2011, page 55*) <http://www.edu.gov.on.ca/eng/document/policy/os/index.html>.

- 4 credits in English (1 credit per grade)
- 3 credits in Mathematics (1 credit in Grade 11 or Grade 12)
- 2 credits in Science

Mississauga Secondary Academy

- 1 credit in Canadian History
- 1 credit in Canadian Geography
- 1 credit in the Arts
- 1 credit in Health and Physical Education
- 1 credit in French as Second Language
- 0.5 credit in Career Studies
- 0.5 credit in Civics

Plus 1 credit from each of the following 3 groups:

Group 1: English (including the Ontario Secondary School Literacy Course), French as a second language, classical languages, international languages, Native languages, Canadian and world studies, Native studies, social sciences and humanities, guidance and career education, cooperative education

Group 2: French as a second language, the arts, business studies, health and physical education, cooperative education

Group 3: French as a second language, science (Grade 11 or 12), computer studies, technological education, and cooperative education

Notes: 1) A maximum of 2 credits in French as a second language may count as additional compulsory credits, 1 credit from Group 1, and 1 credit from either Group 2 or Group 3; 2) A maximum of 2 credits in cooperative education may count as additional compulsory credits, selected from any of Groups 1, 2, or 3.

2.1.2 12 Optional Credits

Students must also earn an additional 12 optional credits from the courses listed as available in the school's course calendar to meet the OSSD's 30 credits requirements.

2.1.3 40-Hour Community Involvement Requirement

As part of the OSSD requirements, the 40-hour community involvement activities will help students better understand their roles and responsibilities in supporting their communities. These activities may be completed at any time during their years in the secondary school program. The school has developed detailed procedures and requirements for the community involvement activities based on the guidelines of the Ministry of Education. (*PPM No. 124a, "Ontario Secondary School Diploma Requirement: Community Involvement Activities in English-Language Schools", April 27, 1999* www.edu.gov.on.ca/extra/eng/ppm/124a.html)

Mississauga Secondary Academy

2.1.4 *Substitution for Compulsory Credits*

To accommodate the student's special needs and interests in their high school education, the school may allow a student to substitute up to **three compulsory credit courses** with courses from other subject areas specified in the list of compulsory credit requirements (including Groups 1, 2 and 3). In all cases, however, the sum of compulsory and optional credits will not be less than **thirty** for students aiming to earn the Ontario Secondary School Diploma and not less than **fourteen** for those aiming to earn the Ontario Secondary School Certificate. The decision to substitute one course for another for a student should be made only if the student's educational interests are best served by such a substitution.

2.1.5 *The Provincial Secondary School Literacy Requirement*

All students are required to meet the secondary school literacy graduation requirement in order to earn an Ontario Secondary School Diploma (**OSSD**). The purpose of this requirement is to determine whether students have the skills in reading and writing that they will need to succeed in school, at work, and in daily life. The requirement is based on the expectations for reading and writing throughout the Ontario curriculum up to and including Grade 9.

To meet the Provincial Secondary School Literacy Requirement, all students are expected to take and successfully complete the Ontario Secondary School Literacy Test (**OSSLT**) in Grade 10. The deferral to take OSSLT can only be granted by the principal under certain circumstances such as the student has not developed sufficient level of English as the English learner.

The **OSSLT** is scheduled by and administered through the Education Quality and Accountability Office (**EQAO**) once each year, usually in the spring. A student can have only two opportunities to take **OSSLT**. Students who failed the **OSSLT** can retake the test in the subsequent year or directly register for the Ontario Secondary School Literacy Course (**OSSLC**) if approved by the principal.

The Ontario Secondary School Literacy Course (**OSSLC**) is a full-credit Grade 12 course offered by the school as an alternative to meet the Provincial Secondary School Literacy Requirement for graduation. The credit earned from **OSSLC** can be used to meet the Grade 11 or Grade 12 compulsory credit requirement in English or to meet the Group 1 compulsory credit requirement for **OSSD**. Successfully completing the **OSSLC** meets the Provincial Secondary School Literacy Requirement for the students who have been unsuccessful at least once in **OSSLT**. More detail about the **OSSLC** can be found at Ontario Curriculum for **OSSLC**

(<http://www.edu.gov.on.ca/eng/curriculum/secondary/english12curr.pdf>).

Mississauga Secondary Academy

Special accommodations and exceptions can only be granted to an individual student under certain circumstances for meeting the Provincial Secondary School Literacy Requirement.

2.2 The Requirements for Ontario Secondary School Certificate

The Ontario Secondary School Certificate (OSSC) is to be granted to students who are leaving secondary school upon reaching the age of eighteen without having met the requirements for the Ontario Secondary School Diploma. A student must have earned a minimum of **14 credits** that includes **7 compulsory credits** (*2 credits in English, 1 credit in Mathematics, 1 credit in Science, 1 credit in Canadian History or Canadian Geography, 1 credit in Health and Physical Education, 1 credit in the Arts, Computer Studies, or Technological Education*) and **7 optional credits**.

The substitution policy for compulsory credit requirements of OSSC is similar to the one for OSSD.

2.3 The Certificate of Accomplishment

The students who are leaving secondary school at age of 18 without having met the OSSD or OSSC requirements can be granted a Certificate of Accomplishment. It is normally issued in combination with the student's Ontario Student Transcript (OST).

3. Information about Courses We Offer

The detailed information about all the courses and selections will be explained in this section.

3.1 The Definition of a Credit

A credit is granted to a student by the principal on behalf of the Minister of Education in recognition of the successful completion of a course that has been scheduled for a minimum of 110 hours.

3.2 The Types of Courses

MSA offers **Academic, Applied, Destination-related** and **Open Courses** that provide students with a wide range of choices to meet the diploma requirements as well as the personal interests and career preparation purposes. While the *Academic, Applied* and *Open courses* are offered in Grades 9 and 10, *Destination –related Courses* and *Open Courses* are offered in Grade 11 and 12.

Mississauga Secondary Academy

Academic Course (D)

Academic courses develop students' knowledge and skills through the study of theory and abstract problems. These courses focus on the essential concepts of a subject and explore related concepts as well. They also incorporate practical applications as appropriate.

Applied Course (P)

Applied courses focus on the essential concepts of a subject and develop students' knowledge and skills through practical applications and concrete examples. Familiar situations are used to illustrate ideas, and students are given more opportunities to experience hands-on applications of the concepts and theories they study.

Open Course (O)

Open courses, which comprise a set of expectations that are appropriate for all students, are designed to broaden students' knowledge and skills in subjects that reflect their interests and prepare them for active and rewarding participation in society. They are not designed with the specific requirements of university, college, or the workplace in mind. In grade 9, you cannot close any doors by choosing one destination related course over another.

Destination Related Course

Students from Grade 11 and 12 will demonstrate increased individual interests and will start to prepare for their postsecondary pathways. More destination related courses are offered under the following categories while some open courses are also available:

- **University Preparation (U)** courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for university programs.
- **University/College Preparation (M)** courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for specific programs offered at universities and colleges.
- **College Preparation (C)** courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for most college programs or for admission to specific apprenticeship or other training Programs.
- **Workplace Preparation (E)** courses are designed to equip students with the knowledge and skills they need to meet the expectations of employers, if they plan to enter the workforce directly after graduation, or the requirements for admission to certain apprenticeship or other training programs.

Mississauga Secondary Academy

3.3 Course Coding System

Course Codes consist of five or six digits. The first three digits are letters that indicate the course. The fourth digit indicates the grade, for example, 2 represents Grade 10 while 3 and 4 represent Grade 11, and 12. The fifth digit indicates the destination related course types (D – Academic, P – Applied, O – Open, U – University preparation, M – University/College preparation, C – College preparation, E-Workplace). For example, ENG4U is the code for Grade 12 University Preparation English Course.

3.4 Course Selection

The decision as to which type of course is most appropriate is an important one. For Grade 8 students, recommendations will be made by the elementary school teacher as part of each student's educational plan. Successful completion of a course in Grade 9 prepares the student to proceed to Grade 10 but students wishing to switch destination related courses will be strongly encouraged to complete extra course work.

All students should study the general information and the diploma requirements carefully. It is expected that all students will work directly toward a diploma.

COURSE SELECTION EXAMPLE: GRADE 9 AND 10 STUDENTS WHO ENTERED GRADE 9 AFTER SEP.1 1999

| GRADE 9 | GRADE 10 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Mississauga Secondary Academy

3.5 Course Descriptions

The following section describes the courses offered by MSA and its prerequisites in detail.

3.5.1 *Grade 9 Course Descriptions*

English, Academic - 2007

(ENG1D)

Prerequisites: None

This course is designed to develop the oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the use of strategies that contribute to effective communication. The course is intended to prepare students for the Grade 10 academic English course, which leads to university or college preparation courses in Grades 11 and 12.

Principles of Mathematics, Academic - 2006

(MPM1D)

Prerequisites: None

This course enables students to develop an understanding of mathematical concepts related to algebra, analytic geometry, and measurement and geometry through investigation, the effective use of technology, and abstract reasoning. Students will investigate relationships, which they will then generalize as equations of lines, and will determine the connections between different representations of a linear relation. They will also explore relationships that emerge from the measurement of three-dimensional figures and two-dimensional shapes. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Science, Academic - 2008

(SNC1D)

Prerequisites: None

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Throughout the course, students will develop their skills in the processes of scientific investigation. Students will acquire an understanding of scientific theories and conduct investigations related to sustainable ecosystems; atomic and molecular structures and the properties of elements and compounds; the study of the universe and its properties and components; and the principles of electricity.

Mississauga Secondary Academy

Geography of Canada, Academic - 2013

(CGC1D)

Prerequisites: None

This course examines interrelationships within and between Canada's natural and human systems and how these systems interconnect with those in other parts of the world. Students will explore environmental, economic, and social geographic issues relating to topics such as transportation options, energy choices, and urban development. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate various geographic issues and to develop possible approaches for making Canada a more sustainable place in which to live.

Visual Arts, Open - 2010

(AVI1O)

Prerequisites: None

This course is exploratory in nature, offering an overview of visual arts as a foundation for further study. Students will become familiar with the elements and principles of design and the expressive qualities of various materials by using a range of media, processes, techniques, and styles. Students will use the creative and critical analysis processes and will interpret art within a personal, contemporary, and historical context.

Core French, Academic - 2014

(FSF1D)

Prerequisites: Minimum of 600 hours of French instruction or equivalent

This course provides opportunities for students to communicate and interact in French with increasing independence, with a focus on familiar topics related to their daily lives. Students will develop their skills in listening, speaking, reading, and writing by using language learning strategies introduced in the elementary Core French program, and will apply creative and critical thinking skills in various ways. They will also enhance their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Healthy Active Living Education, Open - 2015

(PPL1O)

Prerequisites: None

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the

Mississauga Secondary Academy

world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Exploring Technologies, Open - 2009

(TIJ1O)

Prerequisites: None

This course enables students to further explore and develop technological knowledge and skills introduced in the elementary science and technology program. Students will be given the opportunity to design and create products and/or provide services related to the various technological areas or industries, working with a variety of tools, equipment, and software commonly used in industry. Students will develop an awareness of environmental and societal issues, and will begin to explore secondary and postsecondary education and training pathways leading to careers in technology-related fields.

Food and Nutrition, Open - 2013

(HFN1O)

Prerequisites: None

This course focuses on guidelines for making nutritious food choices. Students will investigate factors that influence food choices, including beliefs, attitudes, current trends, traditional eating patterns, food-marketing strategies, and individual needs. Students will also explore the environmental impact of a variety of food choices at the local and global level. The course provides students with opportunities to develop food-preparation skills and introduces them to the use of social science research methods in the area of food and nutrition.

Individual and Family Living, Open - 2013

(HIF1O)

Prerequisites: None

This course explores, within the context of families, some of the fundamental challenges people face: how to meet basic needs, how to relate to others, how to manage resources, and how to become responsible members of society. Students will explore adolescent development and will have opportunities to develop interpersonal, decision-making, and practical skills related to daily life. They will learn about the diverse ways in which families function in Canada and will use research skills as they explore topics related to individual and family needs and resources.

Mississauga Secondary Academy

3.5.2 Grade 10 Course Descriptions

English, Academic - 2007

(ENG2D)

Prerequisites: Grade 9 English, Academic or Applied

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

Principles of Mathematics, Academic - 2005

(MPM2D)

Prerequisites: Grade 9 Mathematics, Academic

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Science, Academic - 2008

(SNC2D)

Prerequisites: Grade 9 Science, Academic or Applied

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

Mississauga Secondary Academy

Canadian History since World War 1, Academic - 2013

(CHC2D)

Prerequisites: None

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Civics (half-credit), Open - 2013

(CHV2O)

Prerequisites: None

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Career Studies (half-credit), Open - 2006

(GLC2O)

Prerequisites: None

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores postsecondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Visual Arts, Open - 2010

(AVI2O)

Prerequisites: None

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the

Mississauga Secondary Academy

critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

Communications Technology, Open - 2009

(TGJ2O)

Prerequisites: None

This course introduces students to communications technology from a media perspective. Students will work in the areas of TV/video and movie production, radio and audio production, print and graphic communications, photography, and interactive new media and animation. Student projects may include computer-based activities such as creating videos, editing photos, working with audio, cartooning, developing animations, and designing web pages. Students will also develop an awareness of environmental and societal issues related to communications technology, and will explore secondary and postsecondary education and training pathways and career opportunities in the various communications technology fields.

Computers Technology, Open - 2009

(TEJ2O)

Prerequisites: None

This course introduces students to computer systems, networking, and interfacing, as well as electronics and robotics. Students will assemble, repair, and configure computers with various types of operating systems and application software. Students will build small electronic circuits and write computer programs to control simple peripheral devices or robots. Students will also develop an awareness of related environmental and societal issues, and will learn about secondary and postsecondary pathways and career opportunities in computer technology.

Introduction to Computer Studies, Open - 2008

(ICS2O)

Prerequisites: None

This course introduces students to computer programming. Students will plan and write simple computer programs by applying fundamental programming concepts, and learn to create clear and maintainable internal documentation. They will also learn to manage a computer by studying hardware configurations, software selection, operating system functions, networking, and safe computing practices. Students will also investigate the social impact of computer technologies, and develop an understanding of environmental and ethical issues related to the use of computers.

Mississauga Secondary Academy

International Languages, Level 2, Academic - 1999

(LBABD – LYXBD)

Prerequisites: None

This course provides students with the language learning experiences that will enable them to communicate in the language of study. Students will continue to develop and apply their speaking skills in a variety of contexts, and will participate in activities that will improve their reading comprehension and writing skills. They will also continue to explore aspects of the culture of countries where the language under study is spoken by taking part in community sponsored events and activities involving both print and technological resources.

Although students will continue to expand their vocabulary and repertoire of language structures, the language they will use at this level will still be simple.

Core French, Academic - 2014

(FSF2D)

Prerequisites: Grade 9 Core French, Academic or Applied

This course provides opportunities for students to communicate in French about personally relevant, familiar, and academic topics in real-life situations with increasing independence. Students will exchange information, ideas, and opinions with others in guided and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through the selective use of strategies that contribute to effective communication. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Food and Nutrition, Open - 2013

(HFN2O)

Prerequisites: None

This course explores, within the context of families, some of the fundamental challenges people face: how to meet basic needs, how to relate to others, how to manage resources, and how to become responsible members of society. Students will explore adolescent development and will have opportunities to develop interpersonal, decision-making, and practical skills related to daily life. They will learn about the diverse ways in which families function in Canada and will use research skills as they explore topics related to individual and family needs and resources.

Healthy Active Living Education, Open - 2015

(PPL2O)

Prerequisites: None

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of

Mississauga Secondary Academy

physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Individual and Family Living, Open - 2013

(HIF2O)

Prerequisites: None

This course explores, within the context of families, some of the fundamental challenges people face: how to meet basic needs, how to relate to others, how to manage resources, and how to become responsible members of society. Students will explore adolescent development and will have opportunities to develop interpersonal, decision-making, and practical skills related to daily life. They will learn about the diverse ways in which families function in Canada and will use research skills as they explore topics related to individual and family needs and resources.

3.5.3 Grade 11 Course Descriptions

English, University - 2007

(ENG3U)

Prerequisites: Grade 10 English, Academic

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course.

English, College - 2007

(ENG3C)

Prerequisites: Grade 10 English, Applied

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will study the content, form, and style of a variety of informational and graphic texts, as well as literary texts from Canada and other countries, and create oral, written, and media texts in a variety of forms for practical and academic

Mississauga Secondary Academy

purposes. An important focus will be on using language with precision and clarity. The course is intended to prepare students for the compulsory Grade 12 college preparation course.

Functions, University - 2007

(MCR3U)

Prerequisites: Grade 10 Principles of Mathematics, Applied

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Functions and Applications, University/College - 2007

(MCF3M)

Prerequisites: Grade 10 Principles of Mathematics, Applied, or Grade 10 Foundations of Mathematics, Applied

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modelling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Biology, University - 2008

(SBI3U)

Prerequisites: Grade 10 Science, Academic

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Chemistry, University - 2008

(SCH3U)

Prerequisites: Grade 10 Science, Academic

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those

Mississauga Secondary Academy

reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Physics, University - 2008

(SPH3U)

Prerequisites: Grade 10 Science, Academic

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

Forces of Nature: Physical Processes and Disasters, University/College - 2015

(CGF3M)

Prerequisites: Issues in Canadian Geography, Grade 9, Academic or Applied

In this course, students will explore physical processes related to the earth's water, land, and air. They will investigate how these processes shape the planet's natural characteristics and affect human systems, how they are involved in the creation of natural disasters, and how they influence the impacts of human disasters. Throughout the course, students will apply the concepts of geographic thinking and the geographic inquiry process and use spatial technologies to analyse these processes, make predictions related to natural disasters, and assess ways of responding to them.

World History to the End of the Fifteenth Century, University/College - 2015

(CHW3M)

Prerequisites: Canadian History since World War I, Grade 10, Academic or Applied

This course explores the history of various societies and civilizations around the world, from earliest times to around 1500 CE. Students will investigate a range of factors that contributed to the rise, success, and decline of various ancient and pre-modern societies throughout the world and will examine life in and the cultural and political legacy of these societies. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras.

Mississauga Secondary Academy

American History, University - 2015

(CHA3U)

Prerequisites: Canadian History since World War I, Grade 10, Academic or Applied

This course explores key aspects of the social, economic, and political development of the United States from precontact to the present. Students will examine the contributions of groups and individuals to the country's evolution and will explore the historical context of key issues, trends, and events that have had an impact on the United States, its identity and culture, and its role in the global community. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating various forces that helped shape American history.

Regional Geography, University/College - 2015

(CGD3M)

Prerequisites: Issues in Canadian Geography, Grade 9, Academic or Applied

This course explores interrelationships between the land and people in a selected region as well as interconnections between this region and the rest of the world. Students will explore the region's environmental, socio-economic, and cultural characteristics and will investigate issues related to natural resources, economic development and sustainability, population change, globalization, and quality of life. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate a range of geographic issues in the region.

Note: This course is developed and delivered with a focus, to be determined by the school, on the geography of a selected region of the world.

Philosophy: The Big Question, Open - 2015

(HZB3M)

Prerequisites: None

This course encourages exploration of philosophy's big questions, such as: What is a meaningful life? What separates right from wrong? What constitutes knowledge? What makes something beautiful? What is a just society? Students will develop critical thinking and philosophical reasoning skills as they identify and analyse the responses of philosophers to the big questions and formulate their own responses to them. Students will explore the relevance of philosophical questions to society and to their everyday life. They will develop research and inquiry skills as they investigate various topics in philosophy.

Mississauga Secondary Academy

Introduction to Anthropology, Psychology, and Sociology, University/College - 2015 (HSP3M)

Prerequisites: The Grade 10 academic course in English, or the Grade 10 academic history course (Canadian and world studies)

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines.

World Religions and Beliefs Traditions: Perspectives, Issues, and Challenges, University/College - 2015 (HRT3M)

Prerequisites: None

This course provides students with opportunities to explore various world religions and belief traditions. Students will develop knowledge of the terms and concepts relevant to this area of study, will examine the ways in which religions and belief traditions meet various human needs, and will learn about the relationship between belief and action. They will examine sacred writings and teachings, consider how concepts of time and place influence different religions and belief traditions, and develop research and inquiry skills related to the study of human expressions of belief.

Visual Arts, University/College - 2010 (AVI3M)

Prerequisites: Visual Arts, Grade 9 or 10, Open

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

Visual Arts, Open - 2010 (AVI3O)

Prerequisites: None

This course focuses on studio activities in one or more of the visual arts, including drawing, painting, sculpture, photography, printmaking, collage, and/or multimedia art. Students will use the

Mississauga Secondary Academy

creative process to create art works that reflect a wide range of subjects and will evaluate works using the critical analysis process. Students will also explore works of art within a personal, contemporary, historical, and cultural context.

Introduction to Computer Science, University - 2008

(ICS3U)

Prerequisites: None

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

Communications Technology, University/College - 2009

(TGJ3M)

Prerequisites: None

This course examines communications technology from a media perspective. Students will develop knowledge and skills as they design and produce media projects in the areas of live, recorded, and graphic communications. These areas may include TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also develop an awareness of related environmental and societal issues, and will explore college and university programs and career opportunities in the various communications technology fields.

Communications Technology: Broadcast and Print Productions, Open - 2009

(TGJ3O)

Prerequisites: None

This course enables students to develop knowledge and skills in the areas of graphic communication, printing and publishing, audio and video production, and broadcast journalism. Students will work both independently and as part of a production team to design and produce media products in a project-driven environment. Practical projects may include the making of signs, yearbooks, video and/or audio productions, newscasts, and documentaries. Students will also develop an awareness of related environmental and societal issues, and will explore secondary and postsecondary education and training pathways and career opportunities in the various communications technology fields.

Mississauga Secondary Academy

Computer Engineering Technology, University/College - 2009

(TEJ3M)

Prerequisites: None

This course examines computer systems and control of external devices. Students will assemble computers and small networks by installing and configuring appropriate hardware and software. Students will develop knowledge and skills in electronics, robotics, programming, and networks, and will build systems that use computer programs and interfaces to control and/or respond to external devices. Students will develop an awareness of related environmental and societal issues, and will learn about college and university programs leading to careers in computer technology.

International Languages, Level 3, University - 2000

(LBACU – LYXCU)

Prerequisites: International Languages, Level 2, Academic

This course offers students opportunities to further develop their knowledge of the international language and to enhance their communication skills. Students will use increasingly sophisticated language in a variety of activities that will enable them to speak and write with clarity and accuracy. Students will also enhance their thinking skills through the critical study of literature, and continue to explore aspects of the culture of countries where the language is spoken through a variety of print and technological resources.

Core French, University - 2014

(FSF3U)

Prerequisites: Core French, Grade 10, Academic

This course offers students extended opportunities to speak and interact in real-life situations in French with greater independence. Students will develop their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, through responding to and exploring a variety of oral and written texts. They will also broaden their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Housing and Home Design, Open - 2015

(HLS3O)

Prerequisites: None

This course introduces students to a range of issues related to housing and home design. Students will learn about the needs that housing fulfils; housing options; home maintenance and safety; and environmental, economic, legal, and social considerations related to housing. They will use the elements and principles of design to analyse design and decorating decisions. Students will develop research skills as they investigate issues related to housing and home design.

Mississauga Secondary Academy

Raising Healthy Children, Open - 2015

(HPC30)

Prerequisites: None

This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to caregiving and child rearing.

3.5.4 Grade 12 Course Descriptions

English, University - 2007

(ENG4U)

Prerequisites: English, Grade 11, University Preparation

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

English, College - 2007

(ENG4C)

Prerequisites: English, Grade 11, College Preparation

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

Mississauga Secondary Academy

Advanced Functions, University - 2007

(MHF4U)

Prerequisites: Functions, Grade 11, University Preparation, or Mathematics for College Technology, Grade 12, College Preparation

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

Calculus and Vectors, University - 2007

(MCV4U)

Prerequisites: Note: The new Advanced Functions course (MHF4U) must be taken prior to or concurrently with Calculus and Vectors (MCV4U).

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three dimensional spaces; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modeling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course.

Mathematics of Data Management, University - 2007

(MDM4U)

Prerequisites: Functions, Grade 11, University Preparation, or Functions and Applications, Grade 11, University/College Preparation

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analysing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

Mississauga Secondary Academy

Biology, University - 2008

(SBI4U)

Prerequisites: Biology, Grade 11, University Preparation

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

Chemistry, University - 2008

(SCH4U)

Prerequisites: Chemistry, Grade 11, University Preparation

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

Physics, University - 2008

(SPH4U)

Prerequisites: Grade 11 Physics, University

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Earth and Space Science, University - 2008

(SES4U)

Prerequisites: Science, Grade 10, Academic

This course develops students' understanding of Earth and its place in the universe. Students will investigate the properties of and forces in the universe and solar system and analyse techniques scientists use to generate knowledge about them. Students will closely examine the materials of Earth, its internal and surficial processes, and its geological history, and will learn how Earth's systems interact and how

Mississauga Secondary Academy

they have changed over time. Throughout the course, students will learn how these forces, processes, and materials affect their daily lives. The course draws on biology, chemistry, physics, and mathematics in its consideration of geological and astronomical processes that can be observed directly or inferred from other evidence.

World History since the Fifteenth Century, University - 2015 (CHY4U)

Prerequisites: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history.

Canada: History, Identity, and Culture, University - 2015 (CHI4U)

Prerequisites: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

This course traces the history of Canada, with a focus on the evolution of our national identity and culture as well as the identity and culture of various groups that make up Canada. Students will explore various developments and events, both national and international, from precontact to the present, and will examine various communities in Canada and how they have contributed to identity and heritage in Canada. Students will investigate the development of culture and identity, including national identity, in Canada and how and why they have changed throughout the country's history. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate the people, events, and forces that have shaped Canada.

World Geography: Urban Patterns and Population Issues, University - 2015 (CGU4M)

Prerequisites: Any university, university/college, or college preparation course in Canadian and world studies, English, or social sciences and humanities

The world's population is growing, it is moving and intermixing, and it is increasingly found in cities. This course explores these changes and the challenges that come with them. It investigates the

Mississauga Secondary Academy

forces that are shaping the world's communities, the patterns of interaction between them, the quality of life within them, and their impact on the world around them. Students will apply the concepts of geographic thinking, the geographic inquiry process, and spatial skills and technologies as they investigate issues related to population change and urban life and propose ways of enhancing the sustainability of communities around the world.

World Issues: A Geographic Analysis, University - 2015 (CGW4U)

Prerequisites: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

In this course, students will address the challenge of creating a more sustainable and equitable world. They will explore issues involving a wide range of topics, including economic disparities, threats to the environment, globalization, human rights, and quality of life, and will analyse government policies, international agreements, and individual responsibilities relating to them. Students will apply the concepts of geographic thinking and the geographic inquiry process, including the use of spatial technologies, to investigate these complex issues and their impacts on natural and human communities around the world.

Philosophy: Questions and Theories, University - 2013 (HZT4U)

Prerequisites: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

This course enables students to acquire an understanding of the nature of philosophy and philosophical reasoning skills and to develop and apply their knowledge and skills while exploring specialized branches of philosophy (the course will cover at least three of the following branches: metaphysics, ethics, epistemology, philosophy of science, social and political philosophy, aesthetics).^{*} Students will develop critical thinking and philosophical reasoning skills as they formulate and evaluate arguments related to a variety of philosophical questions and theories. They will also develop research and inquiry skills related to the study and practice of philosophy.

Visual Arts, University/College - 2010 (AVI4M)

Prerequisites: Visual Arts, Grade 11, University/College Preparation

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials,

Mississauga Secondary Academy

processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Computer Science, University - 2008 (ICS4U)

Prerequisites: Introduction to Computer Science, Grade 11, University Preparation

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

Communications Technology, University/College - 2009 (TGJ4M)

Prerequisites: Communications Technology, Grade 11, University/College Preparation

This course enables students to further develop media knowledge and skills while designing and producing projects in the areas of live, recorded, and graphic communications. Students may work in the areas of TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also expand their awareness of environmental and societal issues related to communications technology, and will investigate career opportunities and challenges in a rapidly changing technological environment.

Communications Technology: Digital Imagery and Web Design, Open - 2009 (TGJ4O)

Prerequisites: None

This course enables students to develop knowledge and skills in the areas of photography, digital imaging, animation, 3D modelling, and web design. Students will work both independently and as part of a production team to design and produce media products in a project-driven environment. Practical projects may include photo galleries, digital images, animations, 3D models, and websites. Students will also expand their awareness of environmental and societal issues related to communications technology, and will explore postsecondary education, training, and career opportunities.

Computer Engineering Technology, University/College - 2009 (TEJ4M)

Prerequisites: Computer Engineering Technology, Grade 11, University/College Preparation

This course extends students' understanding of computer systems and computer interfacing with external devices. Students will assemble computer systems by installing and configuring appropriate

Mississauga Secondary Academy

hardware and software, and will learn more about fundamental concepts of electronics, robotics, programming, and networks. Students will examine related environmental and societal issues, and will explore postsecondary pathways leading to careers in computer technology.

International Languages, Level 4, University - 2000

(LBADU – LYXDU)

Prerequisites: International Languages, Level 3, University Preparation

This course prepares students for university studies in the international language. Students will enhance their ability to use the language with clarity and precision, and will develop the language skills needed to engage in sustained conversations and discussions, understand and evaluate information, read diverse materials for both study and pleasure, and write clearly and effectively. Students will also have opportunities to add to their knowledge of the culture of countries where the language is spoken through the use of community resources and computer technology.

Core French, University - 2000

(FSF4U)

Prerequisites: Core French, Grade 11, University Preparation

This course draws on a variety of themes to promote extensive development of French language skills. Students will consolidate their oral skills as they discuss literature, culture, and current issues. They will read a variety of texts and will write a formal essay. The use of correct grammar and appropriate language conventions in both spoken and written French will be emphasized throughout the course.

The World of Fashion Industry, Open

(HNB4M)

Prerequisites: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

This course gives students the opportunity to explore the world of fashion. Students will learn how to create a fashion product using various tools, techniques, and technologies while developing their practical skills. Students will learn about various factors that affect the global fashion industry, the needs of specialized markets, and the impact of fibre and fabric production and care. In addition, they will learn about social and historical influences on fashion. Students will apply research skills when investigating aspects of the fashion world.

Mississauga Secondary Academy

3.5.5 Ontario Secondary School Literacy (OSSLC) Course

Ontario Secondary School Literacy - 2003

(OLC40)

Eligibility requirement: Students who have been eligible to write the OSSLT at least twice and who have been unsuccessful at least once are eligible to take the course. (Students who have already met the literacy requirement for graduation may be eligible to take the course under special circumstances, at the discretion of the principal.)

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

3.5.6 English as a Second Language (ESL) Courses

ESL, Level 1, Open

(ESLAO)

Prerequisites: None

This course builds on students' previous education and language knowledge to introduce them to the English language and help them adjust to the diversity in their new environment. Students will use beginning English language skills in listening, speaking, reading, and writing for everyday and essential academic purposes. They will engage in short conversations using Basic English language structures and simple sentence patterns; read short adapted texts; and write phrases and short sentences. The course also provides students with the knowledge and skills they need to begin to adapt to their new lives in Canada.

ESL, Level 2: Open

(ESLBO)

Prerequisites: ESL Level 1 or equivalent

This course extends students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations in structured situations on a variety of familiar and new topics; read a variety of texts designed or adapted for English language learners; expand their knowledge of English grammatical structures and sentence patterns; and link English sentences to compose paragraphs. The course also supports students' continuing adaptation to the Ontario school system by expanding their knowledge of diversity in their new province and country.

Mississauga Secondary Academy

ESL, Level 3: Open

(ESLCO)

Prerequisites: ESL Level 2 or equivalent

This course further extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom oral presentations; read a variety of adapted and original texts in English; and write using a variety of text forms. As well, students will expand their academic vocabulary and their study skills to facilitate their transition to the mainstream school program. This course also introduces students to the rights and responsibilities inherent in Canadian citizenship, and to a variety of current Canadian issues.

ESL, Level 4: Open

(ESLDO)

Prerequisites: ESL Level 3 or equivalent

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations and to participate in Canadian society as informed citizens. Students will develop the oral-presentation, reading, and writing skills required for success in all school subjects. They will extend listening and speaking skills through participation in discussions and seminars; study and interpret a variety of grade-level texts; write narratives, articles, and summaries in English; and respond critically to a variety of print and media texts.

ESL, Level 5: Open

(ESLEO)

Prerequisites: ESL Level 4 or equivalent

This course provides students with the skills and strategies they need to make the transition to college and university preparation courses in English and other secondary school disciplines. Students will be encouraged to develop independence in a range of academic tasks. They will participate in debates and lead classroom workshops; read and interpret literary works and academic texts; write essays, narratives, and reports; and apply a range of learning strategies and research skills effectively. Students will further develop their ability to respond critically to print and media texts.

3.5.7 Locally Developed Courses

Locally developed courses are courses that may be developed by a board for students in a particular school or region to accommodate educational and/or career preparation needs that are not met through courses within the provincial curriculum policy documents. MSA currently does not offer locally developed course.

Mississauga Secondary Academy

3.6 Access to Course Outlines and Curriculum

The course outlines for each course offered by the school are on file in the school. The Ontario curriculum for each subject and grade are also on file in the school. Students and parents can also access the Ontario curriculum online at <http://www.edu.gov.on.ca/eng/curriculum/secondary/>.

3.7 Policy Regarding Course Prerequisite, Change and Withdrawal

Course selection should be done carefully by considering the student's career interest, pathways, and compulsory requirements from the Ministry, as well as the parents' approval for students under 18 years old. MSA has specific procedures and guidelines in place as well as the student guidance office to help.

3.7.1 *Course Prerequisites*

A prerequisite course is a course that must be taken prior to a succeeding course. These courses are identified in the student calendar under the course heading. The rules for prerequisite courses are set by the Ministry of Education and can be accessed online. If a parent or an adult student requests that a prerequisite be waived, the principal will determine whether or not the prerequisite should be waived. (www.edu.gov.on.ca/eng/document/curricul/secondary/descript/descri9e.pdf).

3.7.2 *Course Change*

Some students may change their educational goals as they proceed through secondary school. The general guidelines for student who wish to change the courses are: 1) to seek parents' approval 2) to consult with the school principal and 3) to meet the course prerequisite.

While changing course types in the earlier stage in high school is relatively easier, changing courses in Grade 10, 11 and 12 should be considered carefully as the prerequisite is more restrictive. However, MSA strives to provide a wide range of courses and a flexible schedule, as well as two additional summer terms for students to meet their prerequisites for courses.

3.7.3 *Course Withdrawal*

If a student withdraws from a course, enter a "W" in the "Credit Earned" column of the report card(s) issued subsequent to the withdrawal. For students (including students with an Individual

Mississauga Secondary Academy

Education Plan) who withdraw from a Grade 11 or 12 course more than five instructional days after the second report card is issued also enter the student's percentage mark at the time of withdrawal in the "Percentage Mark" column.

3.7.4 *Prior Learning Assessment and Recognition (PLAR)*

Students now have the opportunity to "challenge" the curriculum rather than take a course where their prior learning or experience indicates this would best serve their educational needs. The student's skills and knowledge acquired from outside Ontario secondary school classrooms are evaluated against the overall expectations outlined in provincial curriculum through a formal evaluation and accreditation process, known as **Prior Learning Assessment and Recognition (PLAR)**.

The PLAR process involves two components: challenge and equivalency. The challenge process is the process whereby students' prior learning is assessed for the purpose of granting credit for a course developed from a provincial curriculum policy document. The equivalency process involves the assessment of credentials from other jurisdictions.

The PLAR policy for regular day school students, exceptional students and mature students are different. While a maximum of 4 credits may be granted to a regular student through the challenge process for Grade 10, 11, and 12 courses; a maximum of 16 equivalency credits may be granted to a mature student following an individual assessment for Grade 9 and 10.

3.8 Additional Ways of Learning

To meet the unique needs of students, the school also provides or permits various ways of learning under the guidelines of the Ministry of Education. The preparations for experiential learning programs at MSA mainly include training in Health and Safety in the Workplace, Employment Legislation, Resume Writing and Interview Skills.

3.8.1 *Cooperative Education*

Cooperative education programs allow students to earn secondary school credits while completing a work placement in the community. These programs complement students' academic programs and are valuable for all students in preparing for their future career.

The cooperative education course consists of a classroom component and a placement component. Cooperative Education credits are earned by initially attending in-school class sessions

Mississauga Secondary Academy

covering topics such as resume writing, interview skills, health and safety in the workplace, and employment legislation. The students will then attend the placement either in the morning or in the afternoon for a minimum of 90 hours per semester.

Cooperative Education students at MSA may earn up four credits, of which two may be used to fulfill the compulsory credits requirement. More information can be accessed from the following www.edu.gov.on.ca/eng/document/curricul/secondary/coop/cooped.pdf.

3.8.2 *Work Experience*

Work experience is a component of a course that provides students with a learning opportunity in the workplace for a limited period of time – from one to four weeks.

3.8.3 *Job Shadowing and Job Twinning*

Job shadowing allows a student to spend up to one day (or, in some cases, up to three days) observing a worker in a specific occupation. Job twinning provides the opportunity for the student to observe a cooperative education student at his or her placement for one-half to one day.

3.8.4 *Independent Study and Private Study*

Independent study is an arrangement by which a student is excused from attending some or all classes in a course in order to study independently but under the supervision of a teacher. Courses delivered through the Independent Learning Centre may form part of independent study. Private study may be permitted if a student has a valid reason for not attending classes or the school does not offer the course(s). The application for private study should be submitted not later than the first school day and the student should complete the course by June 30th of the year.

For both independent and private study, the student's progress and achievement should be closely monitored and evaluated by the school based on the curriculum requirements.

3.9 Assessment, Evaluation, and Reporting

Understanding the primary purpose of assessment and evaluation is to improve student learning, MSA has comprehensive procedures and policies in place for evaluating and reporting on students, teachers and school staff.

Mississauga Secondary Academy

3.9.1 *What are the expectations? --- The Standards (Assessment)*

A student needs to be very clear about what the learning expectations are in order to be successful. MSA follows the Ontario curriculum as the standards in student assessment. **Assessment** is the process of gathering information that accurately reflects how well a student is achieving the curriculum expectations in a subject or course.

The Standards: include *content standards* and *performance standards*. The content standards are the curriculum expectations identified for every subject and discipline in the course outlines as the *overall expectations* and *specific expectations*. The performance standards are outlined in the achievement chart that appears in the curriculum document for every subject or discipline. Categorized in four areas, *knowledge and understanding*, *thinking*, *communication* and *application*, the achievement chart (rubric) is a fair and consistent guideline for teacher to assess student's performance.

3.9.2 *What are the Achievements? --- Evaluation*

Evaluation focuses on the students' achievement of the overall expectations. Evidence of student achievement for evaluation is collected over time from three different sources – *observations*, *conversations*, and *student products*. "Student products" may be in the form of tests or exams and/or assignments for evaluation. Assignments for evaluation may include rich performance tasks, demonstrations, projects, and/or essays. Overall, a student's performance consists of 70% of the term work and 30% of final assessment. Please refer to the course outlines for each subject for detailed evaluation breakdown.

3.9.3 *How to Report the Performance? --- Reporting*

The Provincial Report Cards is the formal and official report of student achievements and they are the mandatory means of communication to students and parents at MSA.

Ontario Student Transcript (OST): As a cumulative and continuous official record, the OST consists of all Grade 9 and 10 credit courses successfully completed, all Grade 11 and 12 credit courses completed or attempted by a student, and the information on the completion of other graduation requirements and requirements for specialized programs. The OST is included in the Ontario Student Record.

Ontario Student Record (OSR): An ongoing record for each student who enrolls in a school operated in Ontario. The OSR is established upon the student's entry to school in Ontario and accompanies the student if the student moves to another school within the province. The OSR contains

Mississauga Secondary Academy

achievement results, credits earned and diploma requirements completed, and other information important to the education of the student. Students and their parents (if the student is not an adult) may examine the contents of the OSR.

Reporting Schedules: MSA uses the provincial report card template provided by the Ministry to report student's performance. The report card is issued four times a year with the first report issued in fall and a final report issued at the end of the school year.

Full Disclosure: The Ministry of Education has a policy of full disclosure in reporting. This policy states that all grade 11 and 12 courses attempted by students must be recorded on Ontario Student Transcripts. This means that any course completed, dropped or failed will appear on a student transcript along with the marks earned in the program. The withdrawal is recorded on the OST by entering "W" in the "credit earned" column of the report card. Full disclosure will take effect five instructional days following the issue of the mid-term report card. This represents the half way point in a term and serves as a consistent guide for reporting full disclosure for grade 11 and 12 courses during the school year. Full disclosure does not apply to students in grade 9 or 10.

4. Partnership in the Learning Journey

While believing every student can be and should be provided a positive environment to be successful in meeting his or her learning goals, success however will not be possible without the full cooperation from all parties in this learning journey: students, parents, teachers and all school staff. MSA has provided an open platform for all involving parties to better understand their roles, requirements and policies.

4.1 The Requirements and Expectations for the Students

In order to be a successful student, he or she needs to know the expectations and requirements to develop the learning skills and work habits.

4.1.1 *Student Code of Conduct*

Students of MSA are to be treated with respect and dignity. In return, they must demonstrate respect for themselves, for others, and for the responsibilities of citizenship through acceptable behavior. The following are examples of the code of conduct for MSA students.

- Behave with integrity, self confidence and esteem;

Mississauga Secondary Academy

- Come to school prepared, on time, and ready to learn;
- Show respect for himself or herself, for others, and for those in authority;
- Co-operate with all school staff and with other students;
- Take active steps to learn and respect the rights of others to learn;
- Follow the established rules and takes responsibility for his or her own actions;
- Refrain from bringing anything to school that may compromise the safety of others.

4.1.2 Administrative Rules and Guidelines

Attendance and Punctuality

Regular attendance at school is critical for the student's learning and achievement of course expectations. Therefore, the school requires all students to attend all their registered classes on time. Students missing **ten hours** of school in a semester or ten hours of an individual subject may be denied one or all of their credits for that semester. Students missing eight hours may not have received 110 hours of classroom instruction or the equivalent and may not have fulfilled Ministry credit requirements. Students returning from long-term illness or from court proceedings must present documentation as soon as possible after returning, or they will be counted as being absent.

Students are considered late for class if they are not present in the class room when the class started. A student is late for more than 50% of the class time will be recorded as absent.

The following procedures will be followed at Mississauga Secondary Academy:

- 1) The teacher will give a warning if a student is late for 3 times, and a written explanation letter to the teacher is to be provided by the student if he or she is late more than 10 times for the course.
- 2) Where possible the school student office will contact parents or guardian when a student is absent.
- 3) The Principal may interview students who have missed six hours of classes. A parent or guardian interview may be necessary with the principal for all students who miss six hours of classes.

Late Assignment Policy

All assignments are due on the date set by the teacher. Exceptions will be made for compassionate or sickness related reasons (doctor's note required). A student whose learning style requires extra time to complete works will discuss this with the teacher at the beginning of the term to develop an individual assignment policy.

Missed Tests or Exams

Mississauga Secondary Academy

Missing the test or exam, especially the final exam is strongly discouraged at MSA as tests weigh a significant percentage in the student performance evaluation based on the Ministry guideline. The missed tests or exams should be made up at a different time with similar equivalency of difficulty if the student can provide legitimate reasons for missing the tests or exams.

Suspension or Expulsion

In case of persistent neglect or serious rejection of school rules or infractions of the criminal code, students may face suspension or expulsion. Serious infractions include: use of profanity, fighting, possession, use of, or being under the influence of drugs or alcohol on school property or at any school activity, smoking on school property, criminal activity in the community, persistent opposition to authority.

4.2 The Requirements and Expectations for the Parents

Parents play a vital role in educating their children and are important source of support for the school in maintaining a safe, inclusive, accepting, and respectful learning environment for all students. The student will not be successful to achieve their learning goals without the parents' support. Based on the Ministry's guideline (http://www.edu.gov.on.ca/eng/parents/involvement/PE_Policy2010.pdf), MSA has implemented a detailed procedure and policies for parent engagement. The following are the examples of the school's expectation on students' parents.

- Show an active interest in their child's school work and progress;
- Communicate regularly with the school;
- Help their child be neat, appropriately dressed, and prepared for school;
- Ensure that their child attends school regularly and on time;
- Promptly report to the school their child's absence or late arrival;
- Show that they are familiar with the provincial Code of Conduct, the board's code of conduct, and school rules;
- Encourage and assist their child in following the rules of behavior;
- Assist school staff in dealing with disciplinary issues involving their child.

4.3 The Requirements and Expectations for the School Staff

Mississauga Secondary Academy

Under the leadership of their principals, teachers and other school staff maintain order in the school and are expected to hold everyone to the highest standard of respectful and responsible behavior. As role models, teachers and other school staff uphold these high standards when they:

- help students work to their full potential and develop their sense of self-worth;
- empower students to be positive leaders in their classroom, school, and community;
- communicate regularly and meaningfully with parents;
- maintain consistent standards of behavior for all students;
- demonstrate respect for all students, staff, parents, volunteers, and other members of the school community;
- prepare students for the full responsibilities of citizenship.

5. Our Support and Resources

We at Mississauga Secondary Academy understand the challenges encountered by the students and we have provided a variety of supports and resources.

5.1 Student Guidance Office and Student Services Office

Our Student Guidance Office mainly provides consultation and guidance for students who need help in selecting courses, planning for their future academic development, and physiologic stress relief. The Guidance Office will communicate regularly with parents regarding students' academic development and work with parents to find solutions. Career education is also provided by the Guidance Office.

The Office of Student Services is mainly involved in any non-academic aspect of student support. Examples of the support are tracking and reporting student attendance, arranging student activities, collecting and validating students' community involvement activities, communicating with parents regarding students' safety, behavior or any concern.

5.2 Career Education

Career Education and Counseling is provided to help students develop skills and knowledge in three areas: learning skills, interpersonal skills and career planning skills. While the learning skills and interpersonal skills are integrated into all courses and programs according to the Ontario Curriculum, the career planning skills education is the focus of the career education at MSA. Based on each student's strengths, interests and career goals, the guidance counselor will help student identify their career paths, skills set and strategies to achieve their goals. The main area of the career training will be "knowing

Mississauga Secondary Academy

self”, “exploring opportunities”, “making decisions”, and “preparing for change and making transitions” based on the Ministry’s guideline. Please refer to the policies document for detail: *Choices Into Action: Guidance and Career Education Program Policy for Ontario Elementary and Secondary Schools* (www.edu.gov.on.ca/eng/document/curricul/secondary/choices/choiceee.pdf).

5.3 Language Supports

Expecting to have a significant portion of our students as English Language Learners (ELLs), the school has well prepared training programs in ESL, TOEFL and IELTS that are delivered by experienced and qualified teachers at flexible schedules so that the ELL students can catch up to meet the graduation requirements.

5.4 Other Resources and Supports

- The school has a library that keeps all resources including books, CDs, manuals and systems for teacher and student use;
- The school is equipped with advanced computers, reliable servers and fast internet connection and is authorized as a professional testing center for TOEFL iBT, Prometric and PearsonVue.
